

BLUE WATER
POOLS • LANDSCAPE • DESIGN

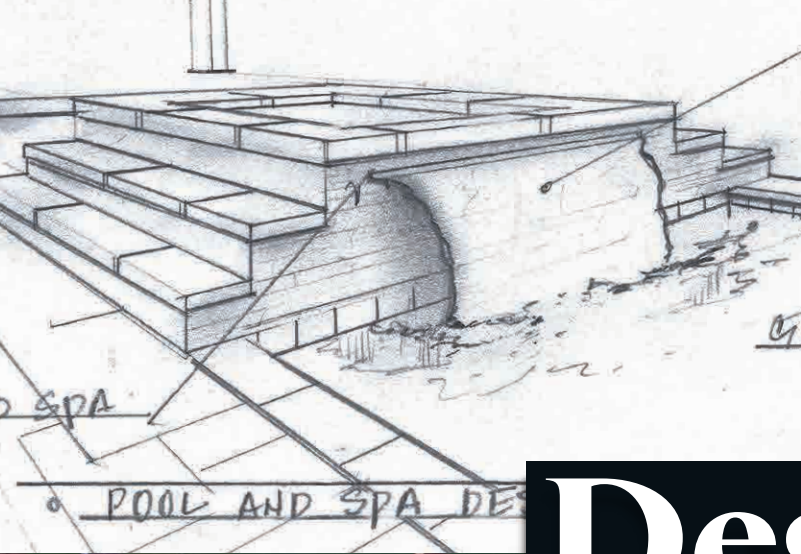

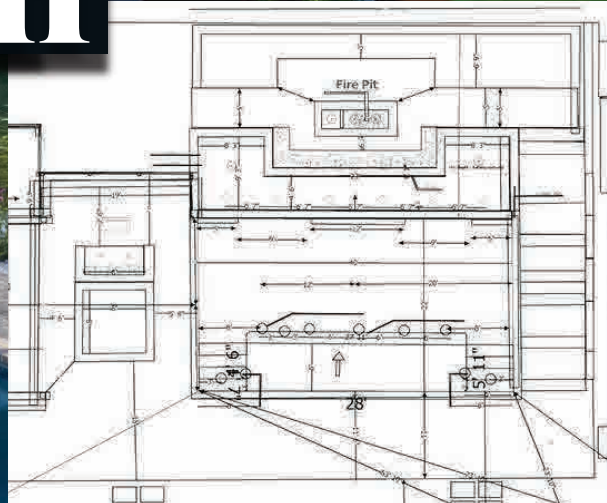

Blue Water Pools and Design is an award-winning West Michigan-based organization that brings innovative design experience and a knowledgeable professional construction team that has completed projects in multiple states across the country.

A dream getaway
in your backyard

Design

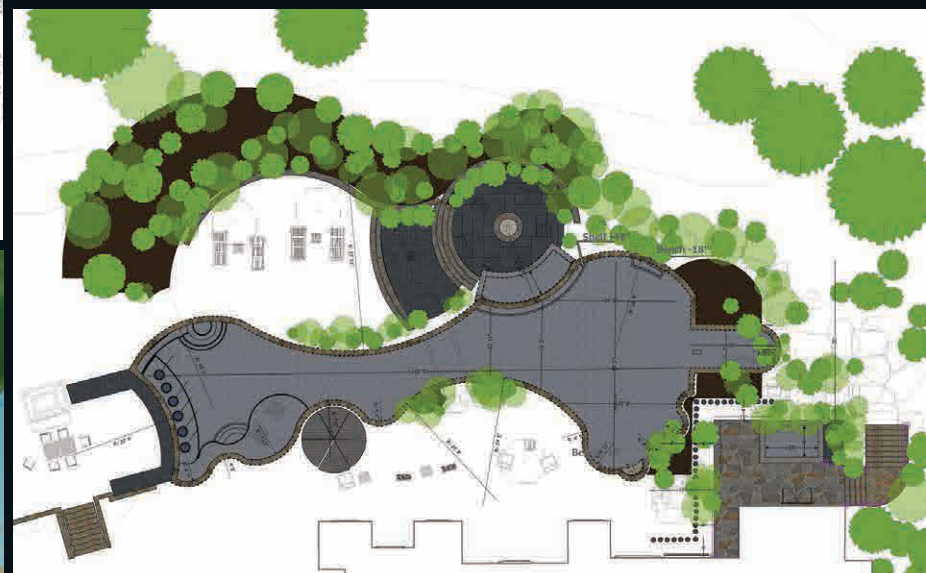

DESIGN

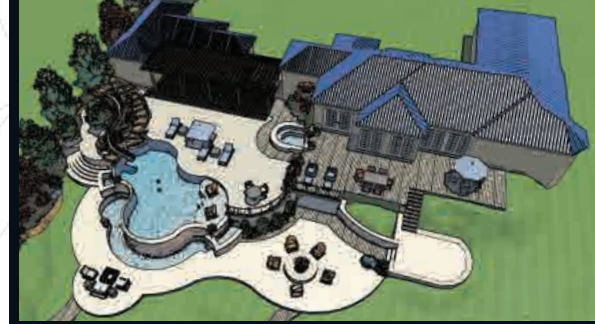

The Blue Water design process uses our expertise and experience to bring your dream backyard to life. After meeting with you and understanding your vision for your new at-home getaway, we begin our planning process, where our artists will sketch your ideas by hand before creating 3D digital renderings of what your project will look like. After your approval, the renderings are used to create architectural blueprints so our construction team can clearly understand the exact specifications of your new backyard paradise.

PROCESS

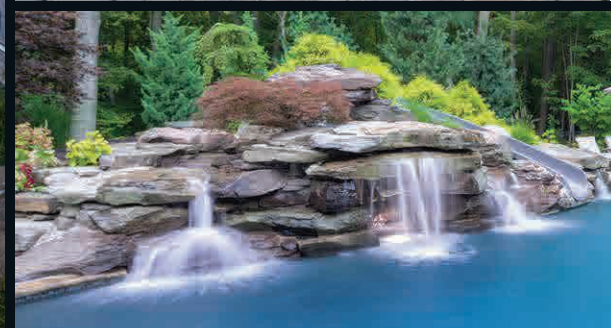

Process

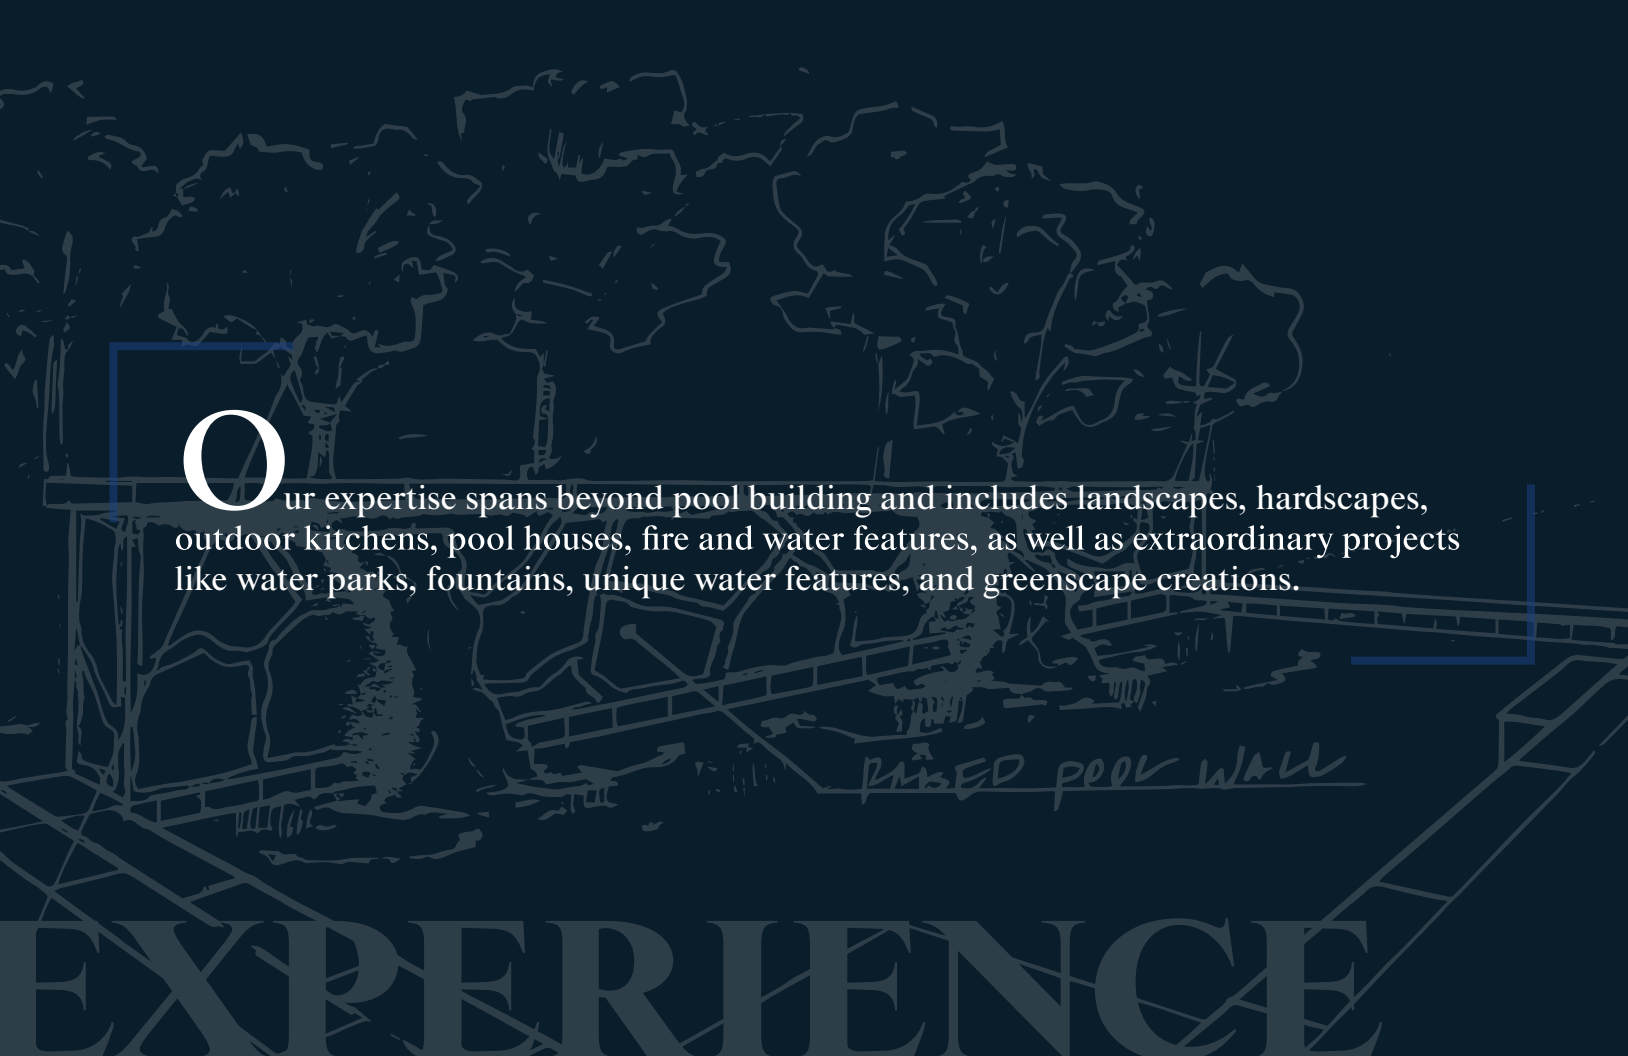

OUR expertise spans beyond pool building and includes landscapes, hardscapes, outdoor kitchens, pool houses, fire and water features, as well as extraordinary projects like water parks, fountains, unique water features, and greenscape creations.

EXPERIENCE

TEAM

Your pool needs to be built by a team of professionals that understand every implication when it comes to creating your new paradise. Our team of masons, plumbers, pool experts, and landscape professionals will ensure your new backyard getaway is properly planned, executed, and meets all the necessary considerations.

CL

With over 80 years of combined experience building pools in various states and climates across the country, we understand the intricacies that need to be considered when building in different environments. On top of that, our president directly supervises every build personally, so you can rest assured that your project is in good hands. Let's start planning your paradise today.
